

display**edge** is a new backlit & frameless, edge-to-edge glass display case. It has been uniquely designed to allow transparencies to be changed easily and safely without having to open or dismantle the display unit.

Manufactured from 6mm toughened glass with radius corners, display**edge** is durable and sustainable through its innovative use of LED technology. A 5mm slot at the

rear allows easy access to the transparency which can be simply removed and replaced as desired. display**edge** is just 25mm thick and is easily fixed for flush mounting.

display**edge** can be positioned in either portrait or landscape format and is IP67 approved for external use. To accommodate all dimensions, this flexible solution is available to suit standard A series paper sizes ranging from A4 to A1.

The arrival of display**edge** brings new and exciting opportunities to create illuminated displays which can be used to enhance promotional material, brand identity, commercial art or wayfinding.

display**edge** has been designed to provide a 'fit and forget' sign solution that requires minimum maintenance. By using LED as its light source, this display unit has a long life of 70,000 hours

or 16 years at 12 hours per day and offers an energy saving of up to 70% compared to traditional light panels. The A4 lumisheet panel consumes just 3.6W with a brightness of 3000Lx.

To empathize with both traditional and contemporary environments, display**edge** is available with either black or white printed borders as standard. Other colours are available to order.

Poster Size (mm)	Overall Frame Size (mm)		Brightness (Lx)	Power Consumption (W)
841 x 594 (A1)	725 x 1035 P	970 x 790 L	2100	20.4
420 x 594 (A2)	550 x 790 P	725 x 615 L	2100	9.6
297 x 420 (A3)	430 x 580 P	550 x 430 L	2700	7.2
297 x 210 (A4)	330 x 450 P	420 x 360 L	3000	3.6
