

news, views and updates from Signbox

Be enlightened on our stand at The Sleep Event 24 - 25th Nov.

Signbox are delighted to announce the first reveal of three brand new products at The Sleep Event, held next week at the Business Design Centre in Islington, London.

Visit our stand number V8a for the first opportunity to see:

Enlighten: A genuine revolution in affordable illuminated smart poster systems incorporating next generation NFC technology.

Cedo and Podo: A Braille and tactile ground surface wayfinding system to help the visually impaired easily find their way around hotels.

Signet: A step change in architectural illuminated entrance signage: a strikingly elegant combination of sign & light.

For more information or to register for your free entry to the exhibition please go to [The Sleep Event](#) website. We are also pleased to offer you a discount of 25% for the Conference - just enter the code CONF10 for the special rate.

Cedo & Podo lead the way with a sense of touch.

Cedo & Podo are tactile ground surface indicators for the visually impaired, designed to inform the presence of a danger, such as an escalator, stair or moving walkway.

Cedo is suitable for internal use and finished in a micro bead blasted anodised aluminium, mirror polished brass or polypropylene.

Podoinox is a tactile ground surface indicator designed for external and high traffic use. Manufactured from 316 grade stainless steel, the bar and buttons are drill fixed with a template to form a guidance system or tactile path.

Podoline is a tactile ground surface indicator designed for queue management within public buildings, hotel and leisure facilities. Available in silver anodised aluminium or mirror polished brass, the bars are drill fixed with a template to form a tactile barrier.

Step into the light with LED illuminated wayfinding.

Created by the Signbox design team, signet was developed in response to customer demand for a contemporary glass nameplate, illuminated with an energy saving light source – creating an iconic focus for hotel, restaurant, and leisure facility signage.

Signet incorporates the latest LED technology, with a fit and forget IP67 rated device housed within a sleek and elegant profile, finished in a silver anodised aluminium.

This glare free luminaire comes complete with structural glass fixings to support a 10mm thick toughened glass panel. The stainless steel security fixings are countersunk to fit flush, with branding or wayfinding, reverse-printed onto the glass.

Signet is available from stock with an A3 size panel in either portrait or landscape format and graphics can be CAD-cut, screen or digitally printed vinyl. Other sizes and material finishes to special order.
