

Hey!

a collection of **signs & graphics** for **social distancing**

A collection of **signs & graphics** for **social distancing**

For over 35 years, Signbox has remained the first name in aspirational signage solutions that push the boundaries of innovation and challenge convention. We apply a conceptual, holistic approach to signage meticulously across market sectors, including high-end corporate and residential interiors, education, healthcare, retail, hotel and leisure environments, across the globe, inside and out.

In response to the Covid-19 pandemic, Signbox has designed an exclusive collection of signs and graphics to assist with social distancing in the workplace. As we all adjust to life in the 'new normal', these are designed as important yet informal salient reminders to 'stay alert' and ensure that we keep the R below 1 and save lives.

Our wayfinding and safety signage expertise provides invaluable support for the workplace to reopen in a safe and informed manner for employees and visitors. This guide illustrates some key messages and touchpoints for creating a socially distanced flow of people within the built environment.

All our signs can be NFC (Near Field Communication) enabled with a tag that links to a specific URL from a smartphone with contactless engagement, providing users with real-time information.

For further information on NFC deployment, please contact our sales team on 01784 438688 or sales@signbox.co.uk
