Stand alone booking solution
Integrates with all AskCody wayfinding and digital signage services.

Booking+™

AskCody® Booking+™ makes it easy to book meeting catering and meeting equipment as add on to your meeting, and automatically update digital overview signs and dynamic doorsigns from AskCody® as well as Ask-Cody® WayFinder™, making it easy for everyone to find their way to the meeting.

Booking+™ works as a stand-alone web based system, which works well in large settings like convention centers and hotels or in multi-user environments, where a number of offices share several meeting rooms and ressources.

Additional options are available like integration with catering sevices for ordering of food & beverages as well as handling the administration and invoicing for the facilities.

A simplified workflow for all involved in meeting booking

Without an intelligent booking solution finding available meeting rooms and planning meeting activities can be cumbersome.

AskCody® Booking™ creates a simplified, structured and optimized workflow for all employees involved in meeting planning, catering and meeting room equipment.

The company provide their employees with optimal conditions for booking meeting rooms and daily meeting activities so that the natural meeting activities do not take up too many working hours in the company every day wasting ressources.

All contact between meeting organisers, the individual departments, attendees to the meeting, the kitchen and the facility management department is typically done by email, telephone or a physical visit. Typically, these many systems are not synchronized or integrated into each other, which often leads to mistakes as well as extra work.

The same procedure is repeatet when meetings are changed or cancelled, resulting in a significant waste of time

Using AskCody® Booking+™ meeting planning procedures become more structured and simplified and the consolidation of unintegrated and unsynchronized systems leads to efficiency, flexibility and user satisfaction, just as misunderstandings and extra work are minimised or eliminated completely.

Why **Booking+?**

❯ Provides an integrated and synchronized booking system making it fast and secure to book meeting resources - all in one working procedure

❯ Cloud based - accessible from everywhere in the world

❯ Provides all users a quick and easy overview of available meeting rooms, catering options, and today's activities

❯ The manual processes are automated and optimized, as well as double bookings, booking errors, and double work are prevented.

❯ Provides the kitchen with automated reports on ordered catering for meetings.
