WayFinder™

AskCody® WayFinder™ is the ideal solution for large and dynamic indoor environments where wayfinding is important. WayFinder will guide you to your destination whether it´s a specific room, an event like an appointment or a seminar, or even a person.

Use AskCody® to improve wayfinding at your campus, hospital, healtcare center, office building, exhibition center or venue for both visitors, students, patients and daily users. This creates a pleasurable, more relaxed and efficient atmosphere and workplace for everyone while freeing up your resources to do their job rather than showing people the way.

Where's that room again? Where's my meeting?

As a key element of the total AskCody® solution package the WayFinder™ will guide you to your destination whether it is finding people, rooms, or points of interest. You can even search for and get directions to specific meetings, appointments or other events. AskCody integrates seamlessly with both Microsoft Exchange/Outlook and Google Calender.

AskCody® WayFinder™ works on major smartphone platforms like iOS, Android and Windows Phone. It's a very light-weight solution, fast and efficient giving you the directions you need when you need them!

Meets tomorrow's demands of utilizing flexible rooms and facilities

AskCody® WayFinder™ is the first system of its kind to offer integration between wayfinding, people and events. The system is based on a flexible architecture with integration into both Google Calender and Microsoft Outlook.

AskCody® is the smartphone based indoor wayfinding revolution that combines all user scenarios related to both indoor wayfinding, digital signage and meeting room administration

For a complete and fully integrated digital wayfinding experience add the AskCody® ActivityView™ for the full overview of building activity and AskCody® Today+™ dynamic signs for specific rooms.

AskCody WayFinder provides accessibility routing when needed. Just tap on the accessibility symbol and your routing changes accordingly.

Integrate AskCody WayFInder on your website, facebook page or in your own native app, creating a consistent, user friendly and platform independent wayfinding experience across platforms.

Why **WayFinder?**

- One digital wayfinding solution across all platforms - Combine smartphone guidance with kiosks and dynamic/interactive maps on websites

- Accessiblity routing for alternative routes

- Free up resources for front desk employes to do their job rather than helping visitors find their way

- Integrated into Exchange/Google calendar for dynamic wayfinding to events or people

- Web based, instant updated and hardware independent

Integrates with leading calendar systems:

Office 365   Outlook   Exchange   Google
