

# Hey!

a collection of **signs, graphics** and **screens** for **social distancing**

# TOP SIX SOCIAL DISTANCING TIPS...

# 1

## **KISS (or, maybe not)**

The Keep It Super Simple approach is a great one to take for such an important topic. A co-ordinated, simple approach is essential to communicate salient messages.

Keep your signage clear, keep it welcoming and make it stand out.

# 2

## **CREATE A THEME**

Either select from one of our colour & design themes, or work with us to create a branded, custom theme just for you.

Keeping to a theme means visitors will immediately be able to recognise your social distancing reminders and stick to them.

For over 35 years, Signbox has remained the first name in aspirational signage solutions that push the boundaries of innovation and challenge convention. We apply a conceptual, holistic approach to signage meticulously across market sectors, including high-end corporate and residential interiors, education, healthcare, retail, hotel and leisure environments, across the globe, inside and out.

In response to the Covid-19 pandemic, Signbox has designed an exclusive collection of signs and graphics to assist with social distancing. As we all adjust to life in the 'new normal', these are designed as important yet informal salient reminders to 'stay alert'.

Our wayfinding and safety signage expertise provides invaluable support for the premises to reopen in a safe and informed manner for employees and visitors. This guide illustrates some key messages and touchpoints for creating a socially distanced flow of people within the built environment.

# 3

## **START AS YOU MEAN TO GO ON**

Make sure you communicate your social distancing messages before a visitor enters your building.

Start outside with our extremely hardwearing external floor vinyls and window graphics so visitors know what to expect before entering your premises.

# 4

## **DESIGN A JOURNEY**

Make it easy for visitors and staff to navigate your building by adding directional arrows on the floor, wall & stair signage and essential hygiene messages.

If there is a one-way system, mark it out clearly.

# 5

## **ACCESSORISE**

To fit alongside your social distancing messages, make sure you have easy to access hand sanitiser stations and protection sneeze screens. Our range of screens include glass and acrylic and can be tailored to almost any area including desk partitions, reception screens and retail screens.

# 6

## **FIT FOR PURPOSE**

*Where there's blame – there is a claim!*  
Signbox have 35 years' experience printing self-adhesive vinyls and there is no substitute for premium quality media and durable over-laminate that is fit for purpose, preventing a trip or slip hazard.

We can recommend the most suitable product for your application, either internal or external, hard floor or carpet, short term or permanent. If you need installation, our dedicated installation team are on hand and working to strict government guidelines.

# FLOOR GRAPHICS

## made for you

Digitally printed self-adhesive vinyl floor stickers.

# SOCIAL DISTANCING STENCILS

## made for you

These social distancing message stencils are made from 3mm thick Foam PVC (Foamex) at 600mm square.

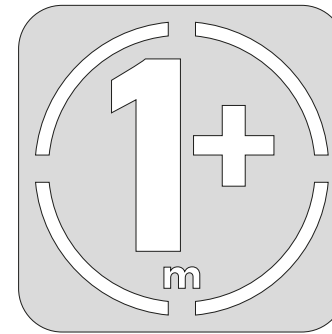

Perfect for **spray painting** your message on various different surfaces, the stencils are durable and lightweight.

Each stencil makes it easy to create signs in car parks, pathways, outside retail stores or on any external / Internal surface. The floor stencils are **easy to use** time and time again if the sign starts to fade, ideal in those situations for high footfall areas and warehouses.

Each design can be **customised** and tailored to suit **your brand**. We can create custom messages and add your corporate logo to the design. Let us be your **Brand Guardians**.

# PROTECTION SCREENS

## made for you

Sneeze screens offer great protection in a number of different environments.

Our selection of screens include a variety of toughened **glass** and **acrylic** displays with or without printed graphics. Perfect for workplaces, retail, hospitality and education environments.

**Glass** screens are perfect for high traffic areas and can be cleaned regularly with proprietary glass cleaners. They are resistant to scratching and are a great permanent solution.

**Acrylic** screens should be cleaned with solvent-free anti-static cleaners. They are perfect for public areas and are lightweight so can be desk mounted, floor standing or ceiling suspended.

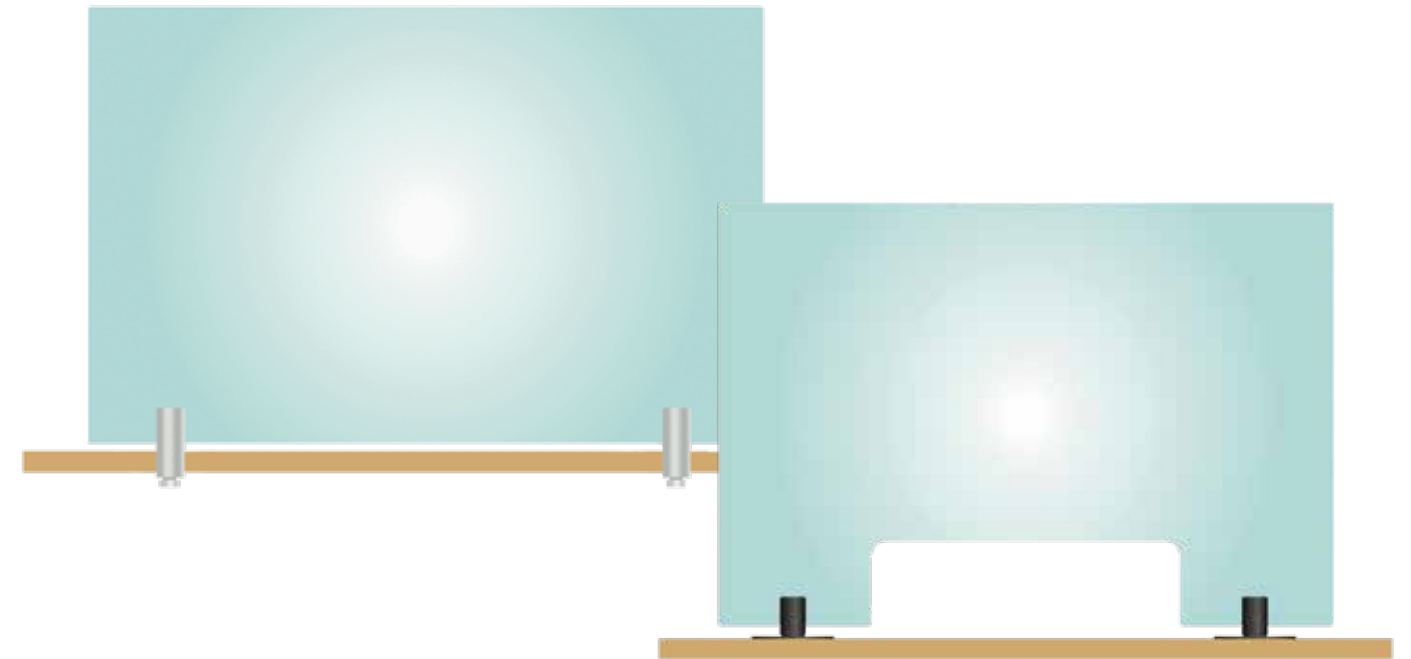

Each screen in our collection can be **tailored** to suit your available space and brand. Customise the size and design of the screen and brand with your logo printed on the face.

We can also **print custom designs**, patterns and finishes on screens to add privacy, ideal for restaurants and cafes.

## find us

# CLEAN AIR DISINFECTION SYSTEM

With all we've learned about pandemics, viral load and hygiene over the last year, it's little wonder all eyes are on keeping our people, workplaces and public spaces clean and safe. We all want to feel confident that our environments are protecting us from pollutants and aerosols that can transmit the viruses we're so desperate to be rid of.

It all has to start with the air we breathe – and thanks to a game-changing new air disinfection system designed by Durst and available exclusively to Signbox, we've got you, your teams and your brand covered with heavenly purified air that keeps everyone safe.

The **air disinfection** system with UV-C technology is highly efficient, whisper-quiet and can be personalised for any environment. It achieves an effectiveness of **>99%**.

It is available with **fully personalised graphics** which can be printed with your branding or messaging. The LED backlit fabric cover simply pulls off and can be replaced at any time.

**Example effectiveness:** 4 people sit at a table and are surrounded by a volume of 8 m<sup>3</sup>. Each person inhales and exhales about 0.5 m<sup>3</sup> of air per hour, a total of 2 m<sup>3</sup>. Durst Habitat disinfects 12.5 times this volume or 25 m<sup>3</sup> in 15 minutes and 50 times the breathing volume of 4 people or 100 m<sup>3</sup> in one hour.

If the Habitat is placed in a larger room, a constant mixing of the room air around the disinfection centre is taking place, which means that by the permanent release of purified air the viral load is reduced even outside the central zone.

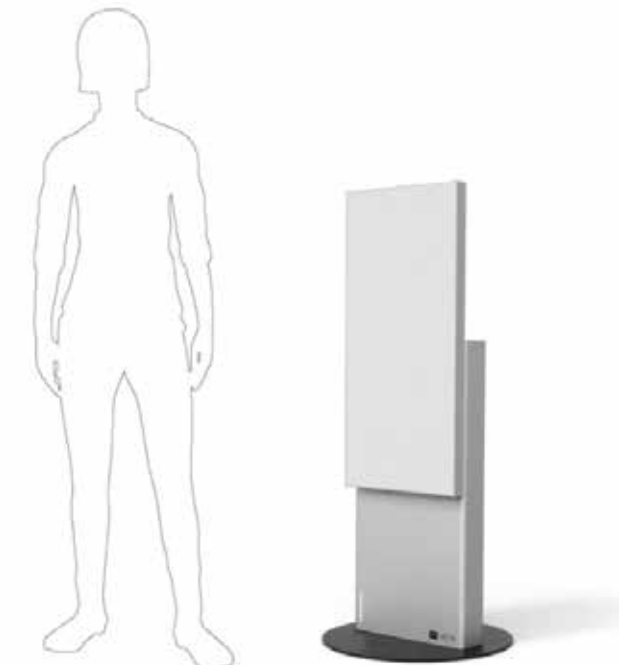

## find us

# HAND SANITISERS

## made for you

Our range of hand sanitisers make it **quick, easy** and **convenient** for your staff and customers to sanitise before they enter the building or room.

Our selection of hand sanitisers includes counter top dispensers, sleek floor standing units and even sanitiser stations that feature built in digital advertising screens or are solar powered.

Perfect for workplaces, retail environments, gyms, education and the urban realm.

The premium dispensers feature additional hygiene measures such as **touch-free dispensing** and built-in **thermal body temperature scanners** which can alert the user if their temperature is too high.

Our modern range of hand sanitisers can be **customised** to suit your branding requirements.
